

Malaffi Provider Portal Quick Reference Guide - Riayati Record

The Malaffi Riayati Record provides a consolidated summary of the patient's medical history from facilities in the Northern Emirates connected to Riayati, the National Unified Medical Record.

By selecting the Riayati Record tab, you will be able to access the latest clinical data shared with Riayati, to help support your clinical decision-making.

Viewing the Riayati Record

The *On Demand Document* is available to view in the CDV tree. Expand the folder to select the *Continuity of Care Record*.

Riayati Documents cannot be printed or saved.

NOTE:
Sensitive data is currently not available in the Riayati Record due to privacy restrictions.

6

On Demand Document

The On Demand Document is a dynamic document updated each time the Riayati Record is accessed, and functions as a **Continuity of Care Record** that includes:

Demographics, Allergies, Problems, Diagnoses, Procedures, Lab & Radiology Results, Vital Signs, Immunisations and Medications, Family and Social History and Plan of Care.

For more information, please see the FAQs on our website
