

# Malaffi Provider Portal Quick Reference Guide - EGP (Emirati Genome Program) Participant Tag

The EGP Participant Tag is a feature that will help you identify community members enrolled in the Emirati Genome Program.

This serves as the first link between the Malaffi HIE platform and the EGP, unlocking future potential in supporting clinical decision of health practitioners with genome data.

The Emirati Genome Program is an important national project that aims to draw a comprehensive genetic map for UAE citizens to accelerate the development of advanced preventive and personalised healthcare solutions for the nation's present and future generations.
